

Internship in Norway

Core Logging as Part of an International Research Project

What's it about?

Want to gain hands-on experience and be part of an international raw materials project? Then join us in Norway! In Ulefoss, you'll support the geotechnical exploration of the unique FEN deposit – together with a dedicated and experienced team.

Want to learn more? Just scan the QR code and watch the video!

Your tasks:

- Assist in the geotechnical documentation of drill cores on site
- Work in a two-person team under the guidance of an experienced team leader

Who we're looking for:

- You're a student of Geosciences, Raw Materials Engineering, Mining & Tunneling, or a related field
- You enjoy practical, hands-on work
- You're a team player, proactive, and reliable
- You're available to work in Norway for at least two consecutive weeks

Available time slots:

- 02.11.2025 - 05.12.2025
- 11.01.2026 - 20.02.2026
- 08.03.2026 - 27.03.2026

Interested?

Then send a short motivation letter, your CV and
